

JUNE 2023

SYNAPTIC RISK PROFILE 4 | INCEPTION DEC. 2011

INVESTMENT OBJECTIVE

To provide capital growth in excess of UK inflation over a three-year rolling period.

STRATEGY, RISK PROFILE AND SUITABILITY

The portfolio has a multi asset approach and will make use of different asset classes to minimize the downside whilst providing an element of upside inline the stated objective.

The portfolio is managed on a low risk profile, (lower risk than global equities). The managers will employ the full range of actively managed Blenheim funds in the construction and running of the portfolio with the necessary risk controls to ensure the portfolio remains in line with it's stated risk profile. The portfolio's exposure to equities will be limited to no more than 25% and the balance will be invested in a blend of other asset classes to maintain the low risk nature of the portfolio without restricting the potential returns in line with the investment objective.

The portfolio is suitable for investors who have a low risk tolerance but wish to be able to maintain the real purchasing power of their investment over a medium to long term basis.

MANAGEMENT

The portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Elliot Basford.

As well as deciding on asset allocation, the team also manages the underlying Blenheim range of funds. These are actively managed utilising a wide investment universe, in line with their investment objectives.

BENCHMARK

BAM MPS PERFORMANCE FIGURES TAKE INTO ACCOUNT THE ONGOING CHARGES OF THE UNDERLYING HOLDINGS BUT EXCLUDE ADVISER CHARGES AND PLATFORM FEES. INCLUSION OF THESE WILL RESULT IN A LOWER RETURN TO THE END INVESTOR, DEPENDING ON THE CLIENT AGREEMENT AND THE PLATFORM USED. PROSPECTIVE YIELD IS NOT GUARANTEED AND DOES NOT INCLUDE DEDUCTIONS FOR EXPENSES, EQUALISATION, OR TAX. IT IS CALCULATED USING THE HOLDINGS' EXPECTED DISTRIBUTIONS OVER THE NEXT 12 MONTHS (DATA AS AT 30 JUNE 2023). ANY VARIATION IN THE ACTUAL AMOUNTS PAID WILL IMPACT THE TOTAL YIELD. THIS IMPACT COULD BE POSITIVE OR NEGATIVE.

ARC PCI: ASSET RISK CONSULTANTS (ARC) OPERATE THE PRIVATE CLIENT INDICES (PCI) ACROSS THE RISK SPECTRUM AS PERFORMANCE MEASUREMENT AND YARDSTICKS FOR DISCRETIONARY PORTFOLIO MANAGERS. THIS DATA INCLUDES PLATFORM FEES AND MAY BE ESTIMATED AND SUBJECT TO REVISION.

MANAGER COMMENTARY

The quarter was marked by extreme exuberance around AI related stocks leading to a very narrowly driven US market back into bull market territory, while the CBOE Volatility Index (VIX- an indicator of risk sentiment) plummeted to a two year low in mid-June. The S&P 500 has been driven higher by just seven stocks this year with the other 493 barely positive. BAM has an allocation to an S&P 500 Index tracker fund as well as active managers. Active managers are often told by risk managers that they cannot hold companies at index weights because their portfolios won't be diversified enough, leading to shorter term underperformance. Japan has also been on a tear this year with the Nikkei 225 index climbing to its highest level for 33 years.

The Overseas Equity Fund was the strongest contributor; however, the strategy disappointingly produced a negative return for the quarter overall yet outperformed the estimated return for the ARC Sterling Cautious peer group. This highlights what a difficult period it was for traditional "lower risk" assets and alternatives as interest rates continued to rise. The Blenheim Alternatives Fund was the only detractor, but the loss outweighed the flat and slightly positive contribution from the other funds.

While there were no high-level asset allocation changes this quarter, there was ongoing activity in the underlying Blenheim funds, and you can find more detail in the monthly Blenheim fact sheets.

So, what lies ahead in the second half of 2023? The global economy is not doing brilliantly but better than expected. Therefore, we think it means higher rates until something breaks, but we keep a watching brief. Is all the bad news in the price? We think most of it is, but we have a fair bit of cash that we can deploy if it isn't.

RETURN AND VOLATILITY

The chart below represents the performance of the Defensive Mixed Assets model versus its benchmark of UK CPI + 2% from inception of the model to the last available UK CPI print. The graphic to the right of the bar chart highlights the range of three year realised volatility for the model since inception along with that of Global Equities, represented by the MSCI World index.
