

# DEFENSIVE MIXED ASSETS PORTFOLIO

## BECKETT ASSET MANAGEMENT LIMITED

April 2020

RISK PROFILE 2-3 | INCEPTION DEC. 2011

### DEFENSIVE MIXED ASSETS PORTFOLIO COMMENTARY

Quarter 1 of 2020 was dominated by the Covid-19 pandemic. March saw equity markets suffer steep falls and has been dubbed the “Corona crash”. The multi asset nature of the strategy has meant the impact on the portfolio has been far less severe than the losses seen in the major global equity indices.

We are taking advantage of the significant fall in equity prices to increase the equity exposure up to the 25% maximum, by trimming assets which have been more resilient. We are also increasing our conviction in certain funds which we believe are flexible enough to capture returns once we come through this virus. We are selling ASI Index Linked Short Duration in its entirety and trimming Jupiter Global Value by 2%. The proceeds are being reinvested into a range of existing holdings with more being reinvested into equities. Allianz Strategic Bond, Artemis Strategic Bond, Chelverton UK Equity Growth and BMO Global Responsible have each been increased by 2%. BMO was a new holding last quarter which has outperformed the Merian fund we exited prior to the recent turmoil.

### MODEL PORTFOLIO RETURN AND VOLATILITY

The chart below represents the performance of the Defensive Mixed Assets model versus its benchmark of UK CPI + 2% from inception of the model to the last available UK CPI print. The graphic to the right of the bar chart highlights the range of three year realised volatility for the model since inception along with that of Global Equities, represented by the MSCI World index.

SINCE INCEPTION PERFORMANCE\*

### PORTFOLIO COMPOSITION

PLEASE NOTE: PORTFOLIO COMPOSITION SHOWN IS AS MARCH 2020. ASSET ALLOCATIONS MAY CHANGE OVER TIME.

## STRATEGY DESCRIPTION

This strategy primarily seeks to achieve a return in excess of inflation over a 3 year rolling time horizon, using the UK Consumer Price Index (CPI) plus 2% as its benchmark. The strategy uses a fund of funds approach to investment and invests in a blend of different asset classes, which will include Equities as well as Fixed Interest, Property, Absolute Return and Cash. The strategy is comprised of funds that invest across a range of geographical areas. The funds are selected on a discretionary basis from a number of top fund management houses.

This strategy is particularly suited to those investors seeking a real return (in excess of UK CPI) over a three year rolling time horizon, with lower volatility than Global Equities over the medium to long-term (5 years plus). Investors should be prepared to accept a cautious level of investment risk.

## INCOME YIELD

The Income yield of this strategy is not targeted and any income received will be reinvested.

## STRATEGY BENCHMARK

The performance of the strategy will target a return of the UK Consumer Price index + 2% over rolling three year periods.

## ONGOING FUND CHARGES (OCF)

In the region of 0.69% but subject to change depending on the underlying funds and platform. OCF does not include any further transactional costs incurred by the funds held or any performance fee that may be levied by them.

## RISK CONTROLS AND INVESTMENT STRATEGY CHARACTERISTICS

- The strategy will always have a minimum and a maximum exposure as defined below. The Maximum equity exposure is restricted to 25% of the fund and is currently 25%.

Country/Asset Class	Minimum Exposure	Maximum Exposure	Current Exposure	Diff
Fixed Income	10%	50%	33%	▼
UK Equities	5%	25%	10%	▲
Global Equities	5%	25%	15%	-
Property	0%	20%	6%	-
Multi Asset Abs Return	5%	30%	12%	-
Equity Based Abs Return	0%	10%	5%	-
Real Assets	0%	15%	11%	-
Cash	5%	20%	8%	-

- At least 45% of the fund must be fixed income investments (for example, corporate and Government bonds) and/or "cash" investments. "Cash" can include investment and certificates of deposit and may be within absolute / managed funds.
- This strategy is limited in the amount it can invest in overseas assets which can be positively or negatively impacted by changes in the relative valuation of currencies if the currency is not hedged.
- The strategy will hold a minimum of 3 different fund holdings and a maximum of 20.
- No individual holding will account for more than 17% of the strategy.
- No investment house will have more than 3 funds represented within the strategy.
- In addition to mainstream Unit Trust / OEIC funds, the strategies may also invest, where appropriate, in: Boutique investment house funds, Alternative investment funds (FAIFs), Investment Trusts, Structured Products, Tracker-type investments and ETFs.
