DEFENSIVE MIXED ASSETS PORTFOLIO COMMENTARY

The recovery in the equity markets that started in the middle of second quarter continued a pace in the third quarter before stopping to take a breath in September. During this period, specifically in August, the S & P 500 had its best month ever since 1984 with a gain of 5.35%, for UK (sterling) investors. The actual gain for the index was higher as Sterling strengthened by some 2.3% against the Dollar.

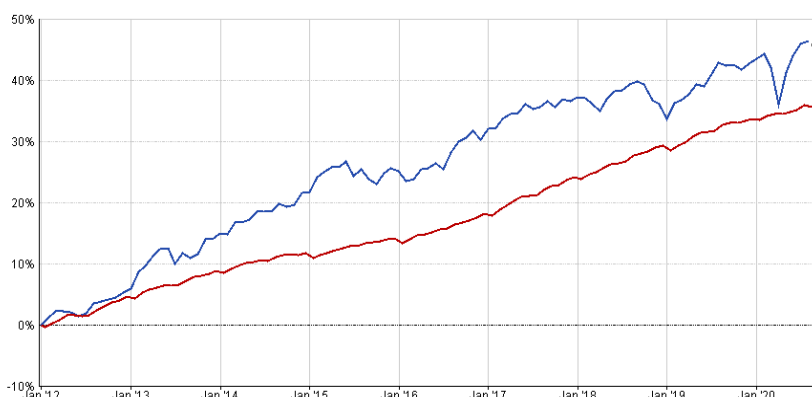

During the third quarter, the model performed positively. Our careful fund manager selection also added value, in particular in the UK; specifically, the model's exposure to the Chelverton UK Growth fund that made a gain of 10.42% versus the UK market (as measured by the top 100 largest companies) which went down by 4.43% in the same period. We remain comfortable with our overall asset allocation and fund manager selection and no changes are planned. However, we will continue to diligently manage the model to ensure its suitability for the ever changing financial and economic conditions.

STRATEGY DESCRIPTION

This strategy primarily seeks to achieve a return in excess of inflation over a 3 year rolling time horizon, using the UK Consumer Price Index (CPI) plus 2% as its benchmark. The strategy uses a fund of funds approach to investment and invests in a blend of different asset classes, which will include Equities as well as Fixed Interest, Property, Absolute Return and Cash. The strategy is comprised of funds that invest across a range of geographical areas. The funds are selected on a discretionary basis from a number of top fund management houses.

This strategy is particularly suited to those investors seeking a real return (in excess of UK CPI) over a three year rolling time horizon, with lower volatility than Global Equities over the medium to long-term (5 years plus). Investors should be prepared to accept a cautious level of investment risk.

INCOME YIELD

The Income yield of this strategy is not targeted and any income received will be reinvested.

STRATEGY BENCHMARK

The performance of the strategy will target a return of the UK Consumer Price index + 2% over rolling three year periods.

ONGOING FUND CHARGES (OCF)

In the region of 0.69% but subject to change depending on the underlying funds and platform. OCF does not include any further transactional costs incurred by the funds held or any performance fee that may be levied by them.
