SYNAPTIC RISK PROFILE 9 | INCEPTION JUNE 2018

INVESTMENT OBJECTIVE

To provide capital growth on a long term basis.

STRATEGY RISK PROFILE AND SUITABILITY

The portfolio has a multi asset approach and will make use of different asset classes to achieve its objective.

The portfolio is managed with a high-risk tolerance. The managers will employ the full range of actively managed funds in the construction and running of the portfolio with the necessary risk controls to ensure the portfolio remains in line with its stated risk profile. The portfolio's exposure to equities can be as high as 100% however the portfolio can invest in a blend of other asset classes for diversification purposes, as a direct reflection of the managers' views of the prevailing market conditions, although it is the manager's belief that equity-based investments are the most suitable asset class for this portfolio.

The portfolio is suitable for investors who are looking for capital growth on a long-term basis (15 years plus), and are prepared to accept a high level of risk, but with the commensurate level of potentially high returns in the long term. However, as a result, investors should also be able to withstand a high level of volatility in the short to medium term.

MANAGEMENT

The portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Elliot Basford.

BENCHMARK

Over the long term (5 years plus), the Investment Associations' (IA) Global Sector index is a suitable benchmark.

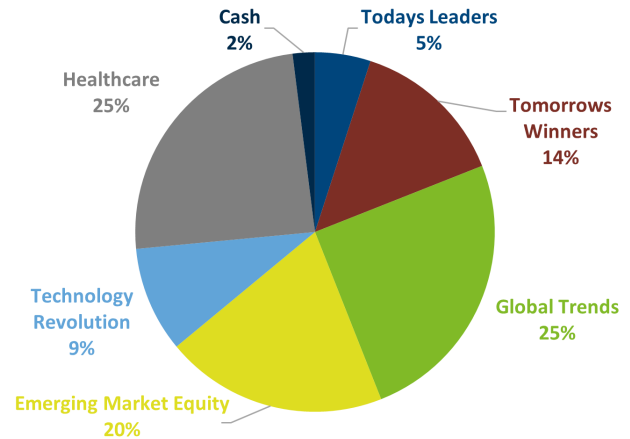

YIELD

This is a total return portfolio, and any income is a by-product of the underlying holdings and will be incidental.

BAM MPS PERFORMANCE FIGURES TAKE INTO ACCOUNT THE ONGOING CHARGES OF THE UNDERLYING HOLDINGS BUT EXCLUDE ADVISER CHARGES AND PLATFORM FEES. INCLUSION OF THESE WILL RESULT IN A LOWER RETURN TO THE END INVESTOR, DEPENDING ON THE CLIENT AGREEMENT AND THE PLATFORM USED. PROSPECTIVE YIELD IS NOT GUARANTEED AND DOES NOT INCLUDE DEDUCTIONS FOR EXPENSES, EQUALISATION, OR TAX. IT IS CALCULATED USING THE HOLDINGS' EXPECTED DISTRIBUTIONS OVER THE NEXT 12 MONTHS (DATA AS AT 30 JUNE 2023). ANY VARIATION IN THE ACTUAL AMOUNTS PAID WILL IMPACT THE TOTAL YIELD. THIS IMPACT COULD BE POSITIVE OR NEGATIVE.

ARC PCI: ASSET RISK CONSULTANTS (ARC) OPERATE THE PRIVATE CLIENT INDICES (PCI) ACROSS THE RISK SPECTRUM AS PERFORMANCE MEASUREMENT AND YARDSTICKS FOR DISCRETIONARY PORTFOLIO MANAGERS. THIS DATA INCLUDES PLATFORM FEES AND MAY BE ESTIMATED AND SUBJECT TO REVISION.

MANAGER COMMENTARY

The quarter was marked by extreme exuberance around AI related stocks leading to a very narrowly driven US market back into bull market territory, while the CBOE Volatility Index (VIX- an indicator of risk sentiment) plummeted to a two year low in mid-June. The S&P 500 has been driven higher by just seven stocks this year with the other 493 barely positive. Active managers are often told by their risk managers that they cannot hold companies at index weights because their portfolios won't be diversified enough, leading to shorter term underperformance.

This portfolio is thematic in nature and saw the largest positive contribution from global trends, technology revolution, healthcare, and emerging markets. There was a small negative contribution from 'tomorrow's winner's and the portfolio delivered a positive return but finished marginally behind the IA Global benchmark.

There were no changes this quarter as the portfolio is long term in nature.

So, what lies ahead in the second half of 2023? The global economy is not doing brilliantly but better than expected. Therefore, we think it means higher rates until something breaks, but we keep a watching brief.
