SOCIAL IMPACT PORTFOLIO COMMENTARY

The recovery in the equity markets that started in the middle of second quarter continued a pace in the third quarter before stopping to take a breath in September. During this period, specifically in August, the S & P 500 had its best month ever since 1984 with a gain of 5.35%, for UK (sterling) investors. The actual gain for the index was higher as Sterling strengthened by some 2.3% against the Dollar.

During the third quarter, the model performed very well benefiting from strong global equity markets. Our exposure to the Janus Henderson Global Sustainable and Liontrust Sustainable Future European funds performed exceptionally well during the third quarter returning 7.88% and 7% respectively. Our property exposure was the only area where the returns detracted from the model performance, namely the L&G UK property and Aegon Property funds with returns of minus 0.13% and 1.09% for the quarter. L&G is reopening for trading during Q4 and we expect Aegon to reopen in Q1 2021.

We remain comfortable with our overall asset allocation and fund manager selection and no changes are planned. However, we will continue to diligently manage the model to ensure its suitability for the ever changing financial and economic conditions.

STRATEGY DESCRIPTION

This strategy is composed of collective investments and is particularly suited to those investors seeking a more Ethical approach to investing. Investors should be prepared to accept a cautious to medium level of investment risk.

There are the typical risks you would experience by investing in any risk asset. However, by having this ethical overlay, the investment universe is narrowed when compared to a standard portfolio and there may be limited ability to take positions in certain regions or asset classes, for example Absolute Return. Although it may not always be the case, investors should note that this restricted universe can have an impact on performance.

INCOME YIELD

The Income yield of this strategy is not targeted and any income received will be reinvested.

STRATEGY BENCHMARK

The performance of the strategy will be measured against the ARC Sterling Balanced Asset PCI over the medium to long term.

This benchmark has a targeted standard volatility band of 40% - 60% relative risk to world equities.

ONGOING FUND CHARGES (OCF)

In the region of 0.69% but subject to change depending on the underlying funds and platform. OCF does not include any further transactional costs incurred by the funds held or any performance fee that may be levied by them.
