JUNE 2024

INVESTMENT OBJECTIVE

To provide capital growth on a total return basis.

STRATEGY RISK PROFILE AND SUITABILITY

The Portfolio has a multi asset approach and will make use of different asset classes to achieve its objective.

The Portfolio is managed with a balanced level of risk. The managers will employ the full range of actively managed Blenheim funds in the construction and running of the Portfolio with the necessary risk controls to ensure the Portfolio remains in line with its stated risk profile. The Portfolio's exposure to equities will be limited to no more than 85% and the balance will be invested in a blend of other asset classes to maintain the moderate risk profile nature of the Portfolio.

The Portfolio is suitable for investors who are looking for a combination of income and longer term (5 years plus) capital growth, and are prepared to accept a moderate level of risk, which is a higher level than Defensive Balanced Mixed Assets Portfolio and with the commensurate higher potential return, but lower than Global Equities.

MANAGEMENT

The Portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Ian Goodchild.

As well as deciding on asset allocation, the team also manages the underlying Blenheim range of funds. These are actively managed utilising a wide investment universe, in line with their investment objectives.

BENCHMARK

ARC Sterling Steady Growth Private Clients Index is a suitable benchmark. This index has a targeted volatility band of 60%- 80% relative to World Equities.

MANAGER COMMENTARY

The model delivered a positive return in June and is in positive territory year to date.

In a reversal from last month, the UK equity exposure was a marginal detractor. However the rest of the Blenheim funds all contributed to returns.

June saw no high-level asset allocation changes. There was, however, activity in Diversified Alternatives with two of our structured notes reaching maturity with positive returns, in Diversified Fixed Income where we added a bit of duration (interest rate sensitivity) and in Overseas where there was a small reduction in Japan in favour of Europe.

A summer of sport is upon us, if not the summer weather to go with it. The men's Euros and Wimbledon are on, and the Paris Olympics are not far off. Some of the French excitement has perhaps been dampened, though, as they had a snap election of their own after European parliamentary elections saw gains for right-wing nationalist parties. This surprised markets, and there was a wobble right at the end of the quarter. This and a disastrous US presidential debate for Biden somewhat overshadowed economic fundamentals in the latter half of June.

RETURN AND VOLATILITY - 5 YEARS TO 30/06/2024

IMPORTANT INFORMATION AND RISK WARNINGS

Charts' data source: FE Fundinfo.

As is the very nature of investing, there are inherent risks and the value of your investment will both rise and fall over time. Please do not assume that past performance will repeat itself and you must be comfortable in the knowledge that you may receive less than you originally invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. The opinions stated are those of Beckett Asset Management Ltd which is authorised and regulated by the Financial Conduct Authority.

BAM MPS performance figures take into account the ongoing charges of the underlying holdings but exclude adviser charges and platform fees. Inclusion of these will result in a lower return to the end investor, depending on the client agreement and the platform used. Prospective yield is not guaranteed and does not include deductions for expenses and tax. It is calculated using the holdings' expected distributions over the next 12 months (data as at 30/06/2024). Any variation in the actual amounts paid will impact the total yield. This impact could be positive or negative.

ARC PCI: Asset Risk Consultants (ARC) operate the Private Client Indices (PCI) across the risk spectrum as performance measurement and yardsticks for discretionary portfolio managers. This data includes platform fees and may be estimated and subject to revision.
