OCTOBER 2024

INVESTMENT OBJECTIVE

To provide capital growth on a total return basis.

STRATEGY RISK PROFILE AND SUITABILITY

The Portfolio has a multi asset approach and will make use of different asset classes to achieve its objective.

The Portfolio is managed with a high-risk tolerance. The managers will employ the full range of actively managed funds in the construction and running of the Portfolio with the necessary risk controls to ensure the Portfolio remains in line with its stated risk profile. The Portfolio's exposure to equities can be as high as 100% however the Portfolio can invest in a blend of other asset classes for diversification purposes, as a direct reflection of the managers' views of the prevailing market conditions, although it is the manager's belief that equity-based investments are the most suitable asset class for this Portfolio.

The Portfolio is suitable for investors who are looking for capital growth on a long-term basis (15 years plus), and are prepared to accept a high level of risk, but with the commensurate level of potentially high returns in the long term. However, as a result, investors should also be able to withstand a high level of volatility in the short to medium term.

MANAGEMENT

The Portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Director of BAM, and Tony Yousefian, Portfolio Manager.

BENCHMARK

Over the long term (5 years plus), the Investment Associations' (IA) Global Sector index is a suitable benchmark.

MANAGER COMMENTARY

The model performance was slightly negative in October causing the year-to-date return to turn negative.

October was a busy month on all fronts within BAM given we the impending US election the UK budget and one of our holdings announcing closure. Baillie Gifford are closing their Healthcare fund. The timing of the announcement was frustrating from an operational perspective and it is a shame to be losing a fund with so much potential. We moved swiftly to find a suitable replacement in Polar Capital Healthcare Opportunities.

Of the three key megatrend exposures, Technological Disruption and Demographic Changes were positive but did not offset the negative contribution from Environmental Change.

The changes to the model have been significant but we can assure investors that each previous fund was worthy of inclusion, but several could target a range of themes, where the managers saw the greatest opportunities. Clearly not everyone sees the world the same way and so for the vast majority of GHP's existence this wasn't a problem. However, in recent months a number of the managers were gravitating to healthcare. Being risk conscious investors, this unintended concentration in one sector wasn't something we were comfortable with and therefore, we saw this as a catalyst to make changes. The holdings within the new-look GHP have little to no ability to invest outside of their assigned megatrend which gives us greater control of the allocations between each theme and will avoid unintended concentration in the future.

IMPORTANT INFORMATION AND RISK WARNINGS

Charts' data source: FE Fundinfo.

As is the very nature of investing, there are inherent risks and the value of your investment will both rise and fall over time. Please do not assume that past performance will repeat itself and you must be comfortable in the knowledge that you may receive less than you originally invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. The opinions stated are those of Beckett Asset Management Ltd which is authorised and regulated by the Financial Conduct Authority.

BAM MPS performance figures take into account the ongoing charges of the underlying holdings but exclude adviser charges and platform fees. Inclusion of these will result in a lower return to the end investor, depending on the client agreement and the platform used.

ARC PCI: Asset Risk Consultants (ARC) operate the Private Client Indices (PCI) across the risk spectrum as performance measurement and yardsticks for discretionary portfolio managers. This data includes platform fees and may be estimated and subject to revision.
