NOVEMBER 2024

INVESTMENT OBJECTIVE

To provide capital growth on a total return basis.

STRATEGY RISK PROFILE AND SUITABILITY

The Portfolio has a multi asset approach and will make use of different asset classes to achieve its objective.

The Portfolio is managed with a high-risk tolerance. The managers will employ the full range of actively managed funds in the construction and running of the Portfolio with the necessary risk controls to ensure the Portfolio remains in line with its stated risk profile. The Portfolio's exposure to equities can be as high as 100% however the Portfolio can invest in a blend of other asset classes for diversification purposes, as a direct reflection of the managers' views of the prevailing market conditions, although it is the manager's belief that equity-based investments are the most suitable asset class for this Portfolio.

The Portfolio is suitable for investors who are looking for capital growth on a long-term basis (15 years plus), and are prepared to accept a high level of risk, but with the commensurate level of potentially high returns in the long term. However, as a result, investors should also be able to withstand a high level of volatility in the short to medium term.

MANAGEMENT

The Portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Ian Goodchild.

BENCHMARK

Over the long term (5 years plus), the Investment Associations' (IA) Global Sector index is a suitable benchmark.

MANAGER COMMENTARY

The model performance was positive in November causing the year-to-date return to turn positive also.

Of the three key megatrend exposures, Technological Disruption was again positive and more than offset the small negative contributions from Environmental Change and Demographic Change.

This year was always going to be interesting from a political perspective with over half of the global population voting in general elections, but not many people would have expected so much off-ballot action. French politics has reached a crisis point. Currently we have an underweight to France, but we continue to follow the evolving situation given France's importance to Europe both financially and politically.

In December each year investors hope for a phenomenon known as a Santa Rally whereby positive momentum builds in investment markets as we approach Christmas. Theories seeking to explain the moves vary from workers investing bonuses to investors simply feeling seasonally optimistic. To put some figures to the theory, over the past 50 years the S&P 500 has been positive in December 78% of the time compared to 59% when we consider all months. Hopefully we will see a Santa Rally but as always, focus should be on longer term performance as short-term moves can be unpredictable.

IMPORTANT INFORMATION AND RISK WARNINGS

Charts' data source: FE Fundinfo.

As is the very nature of investing, there are inherent risks and the value of your investment will both rise and fall over time. Please do not assume that past performance will repeat itself and you must be comfortable in the knowledge that you may receive less than you originally invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. The opinions stated are those of Beckett Asset Management Ltd which is authorised and regulated by the Financial Conduct Authority.

BAM MPS performance figures take into account the ongoing charges of the underlying holdings but exclude adviser charges and platform fees. Inclusion of these will result in a lower return to the end investor, depending on the client agreement and the platform used.

ARC PCI: Asset Risk Consultants (ARC) operate the Private Client Indices (PCI) across the risk spectrum as performance measurement and yardsticks for discretionary portfolio managers. This data includes platform fees and may be estimated and subject to revision.
