DECEMBER 2024

INVESTMENT OBJECTIVE

To provide capital growth on a total return basis.

STRATEGY RISK PROFILE AND SUITABILITY

The Portfolio has a multi asset approach and will make use of different asset classes to achieve its objective.

The Portfolio is managed with a high-risk tolerance. The managers will employ the full range of actively managed funds in the construction and running of the Portfolio with the necessary risk controls to ensure the Portfolio remains in line with its stated risk profile. The Portfolio's exposure to equities can be as high as 100% however the Portfolio can invest in a blend of other asset classes for diversification purposes, as a direct reflection of the managers' views of the prevailing market conditions, although it is the manager's belief that equity-based investments are the most suitable asset class for this Portfolio.

The Portfolio is suitable for investors who are looking for capital growth on a long-term basis (15 years plus), and are prepared to accept a high level of risk, but with the commensurate level of potentially high returns in the long term. However, as a result, investors should also be able to withstand a high level of volatility in the short to medium term.

MANAGEMENT

The Portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Ian Goodchild.

BENCHMARK

Over the long term (5 years plus), the Investment Associations' (IA) Global Sector index is a suitable benchmark.

PORTFOLIO CONSTITUENTS

REGIONAL SPLIT OF EQUITY EXPOSURE

MANAGER COMMENTARY

The model delivered a small negative return in December and disappointingly finished the year flat.

All three key megatrend exposures contributed negatively to performance in December but Technological Disruption was the most defensive of the three.

Large investments are planned in Europe in solar and wind, green hydrogen, and electrification, as the sector benefits from the region's energy transition under the EU Green Deal, with a Clean Industrial Deal to be published in the first quarter. Industries like electronics, engineering and aerospace, and pharmaceuticals should also experience above-average growth which will help the performance which lagged in 2024.

Trump's victory has driven investors to increase overweight to US equities, drawing in capital from the rest of the world. There are high expectations, high valuations and high allocations to the US, but comparatively cautious positioning, valuations and allocations elsewhere.

As we usher in 2025, we've now had two years of plus 20 percent plus gains for US Equities. The return of Trump suggests market risks are rising. With both the US stock market and retail investor optimism at all-time highs, backed by record inflows to US equities, the sensible option is a diversified portfolio.

RETURN SINCE INCEPTION

IMPORTANT INFORMATION AND RISK WARNINGS

Charts' data source: FE Fundinfo.

As is the very nature of investing, there are inherent risks and the value of your investment will both rise and fall over time. Please do not assume that past performance will repeat itself and you must be comfortable in the knowledge that you may receive less than you originally invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. The opinions stated are those of Beckett Asset Management Ltd which is authorised and regulated by the Financial Conduct Authority.

BAM MPS performance figures take into account the ongoing charges of the underlying holdings but exclude adviser charges and platform fees. Inclusion of these will result in a lower return to the end investor, depending on the client agreement and the platform used.

ARC PCI: Asset Risk Consultants (ARC) operate the Private Client Indices (PCI) across the risk spectrum as performance measurement and yardsticks for discretionary portfolio managers. This data includes platform fees and may be estimated and subject to revision.
