INVESTMENT OBJECTIVE

To provide capital growth.

STRATEGY RISK PROFILE AND SUITABILITY

- The Portfolio will use equities to achieve its objective.
- The Portfolio is managed with a high-risk tolerance.
- The Portfolio is suitable for investors who are looking for capital growth on a long-term basis (10 years plus), and are prepared to accept a high level of risk, but with the commensurate level of potentially high returns in the long term. However, as a result, investors should also be able to withstand a high level of volatility in the short to medium term.

MANAGEMENT

The Portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Ian Goodchild.

BENCHMARK

Over the long term (5 years plus), the Investment Associations' (IA) Global Sector Index is a suitable benchmark.

MANAGER COMMENTARY

With the US “Liberation Day” on 2nd April and an intra-month low reached on 7th April; it was a negative month for all models with a great deal of volatility. This model was down and is not in positive territory for the calendar year to date.

This month both the UK and Overseas exposures were negative, but the UK was relatively more defensive.

There were some changes made in the Overseas part of the model where we continued to reduce US exposure in favour of Europe. Please check out the Blenheim Fund Factsheets or the latest BAMalyst for more details.

It feels as though most countries will likely now make trade deals with the US whilst in the 90 days pause. What those deals look like is very up in the air, but it's reasonable to expect Trump to be seeking deals that are at least optically good for America and can be spun to the American public as “unbelievable deals.” Markets will stay choppy for a while.

RETURN AND VOLATILITY

Due to the recent launch date of the fund, there is insufficient performance track record to display.

IMPORTANT INFORMATION AND RISK WARNINGS

Charts' data source: FE Fundinfo.

As is the very nature of investing, there are inherent risks and the value of your investment will both rise and fall over time. Please do not assume that past performance will repeat itself and you must be comfortable in the knowledge that you may receive less than you originally invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment.

BAM MPS performance figures take into account the ongoing charges of the underlying holdings but exclude adviser charges and platform fees.
