JUNE 2025

INVESTMENT OBJECTIVE

To provide capital growth on a total return basis.

STRATEGY RISK PROFILE AND SUITABILITY

The Portfolio invests wholly in the Blenheim Ethical Growth fund. This is a multi-asset fund, investing in a range of assets which are considered by the managers to be ethical investment choices

It is managed with a high-risk tolerance, focused on the long term. Consequently, it will contain a high degree of volatility. As a result, it is only suitable for investors with a long-term time horizon (10 years plus) who can withstand large fluctuations in the value of their investments in the short to medium term. However, the high volatility will likely be rewarded with a commensurate high return in the long run.

Exposure to equities is expected to be between 65% and 85% under normal circumstances, although it may range between 40% and 85%.

Eligible investments must:

- have Environmental, Social or Governance (ESG) objectives, accreditation or alignment;
- align to one or more of the sustainable development goals, as measured by the Investment manager's assessment;
- contain a minimum of 70% of the collectives focusing on shares and bonds, and seek to avoid companies that derive revenue from: human rights abuses, environmental abuse, animal testing for cosmetics and armaments.

MANAGEMENT

The Portfolio is managed by Beckett Asset Management's team of investment professionals: Samantha Owen, Tony Yousefian and Ian Goodchild.

BENCHMARK

ARC Sterling Equity Risk Private Clients Index is a suitable benchmark. This Index has a targeted volatility band of 80%-110% relative to World Equities.

PERFORMANCE

Due to the recent launch date of the fund, there is insufficient performance track record to display.

PORTFOLIO CONSTITUENTS

REGIONAL SPLIT OF EQUITY EXPOSURE

MANAGER COMMENTARY

This model delivered another positive gain in June but was slightly behind its benchmark.

Global financial markets ended a volatile first six months of 2025 with a rally in risky assets, with the US S&P 500 equity index hitting record highs and tech stocks staging a big comeback. Nvidia has now rebounded more than 60% after its April low to become the world's most valuable company. Despite the US gains in June, it is nothing compared with Europe's renaissance in the first six months. European stocks ended the first half up more than 13 per cent, double the gains in the US which the portfolios benefitted from. Monetary stimulus from the European Central Bank and Germany's historic shift on fiscal expansion – worth hundreds of billions of euros – boosted expectations for stronger growth in the bloc.

Despite an escalation of conflict in the Middle East, continued fighting in Ukraine and Tariffs only on pause, investors have so far shrugged off concerns. Markets have been relatively calm as measured by the Vix “fear gauge” which at the end of June was back to the levels at the start of 2025. We though, have one eye on the dark clouds on the horizon. Please enjoy the summer, whether it is watching sport, taking to the seaside or just spending with friends and family. Leave worrying about the world and your investments to us.

RETURN AND VOLATILTY

Due to the recent launch date of the Fund, there is insufficient performance track record to display.

IMPORTANT INFORMATION AND RISK WARNINGS

Charts' data source: FE Fundinfo.

As is the very nature of investing, there are inherent risks and the value of your investment will both rise and fall over time. Please do not assume that past performance will repeat itself and you must be comfortable in the knowledge that you may receive less than you originally invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. The opinions stated are those of Beckett Asset Management Ltd which is authorised and regulated by the Financial Conduct Authority.

BAM MPS performance figures take into account the ongoing charges of the underlying holdings but exclude adviser charges and platform fees. Inclusion of these will result in a lower return to the end investor, depending on the client agreement and the platform used. Prospective yield is not guaranteed and does not include deductions for expenses and tax. It is calculated using the holdings' expected distributions over the next 12 months (data as at 30/06/2025). Any variation in the actual amounts paid will impact the total yield. This impact could be positive or negative.

ARC PCI: Asset Risk Consultants (ARC) operate the Private Client Indices (PCI) across the risk spectrum as performance measurement and yardsticks for discretionary portfolio managers. This data includes platform fees and may be estimated and subject to revision.
